

# PPDRAW DRAW MONITOR

**POWER PROBE®**  
THE **ULTIMATE** IN  
AUTOMOTIVE CIRCUIT TESTING

EXCLUSIVE WARRANTY  
**2**  
YEAR

This product is designed for use in monitoring car battery voltage, leakage current, and serving as a backup power supply when replacing the battery. The product is connected to the car's OBDII interface via an OBDII connection cable to supply 12V power to the car and monitor the car system's leakage current for diagnosing various faults. It can also serve as a backup power supply for the car during battery replacement, preventing the car's mainboard from losing power and data. Draw Monitor can also monitor battery voltage through the OBDII port.

### Key Features

- Monitor vehicle parasitic draw up to 10A
- Maintain battery backup for vehicle settings
- Connects through 16-pin OBDII connector
- Full color screen with easy-to-read graphics
- Extended data logging through Power Probe Link App
- Long lasting battery life up to 3,000mAh Lithium battery

## SPECIFICATIONS

- **Smart Output function output:** 12V 10A
- **Monitor function input:** 0-30V
- **Voltage display accuracy:** 1%+5dig ; resolution 0.1 V
- **Current display accuracy:** 3%+5dig resolution 1mA
- **Built-in lithium battery:** 18650 14.4V/3000mA
- **Display:** 2.8-inch TFT color screen 240\*320
- **Wireless connection:** Bluetooth
- **Input and output interface:** OBDII interface
- **Charging interface:** USB TYPE-C interface, supports PD fast
- **Certifications:** FCC, CE, ETL-us, UKCA, EAC(149°F)

## CONTENTS

- Canvas bag
- Manual
- 100cm USB Type A to Type C Cable
